Research on Deterior – Reviewing It

By Shomit Sirohi (comments by Slavoj Zizek)

Introduction

From Microsoft to other companies like it – Sirohi is busy talking about dot.communist manifesto he also means. To help countries research in Slavoj Zizek, or Hegel and his style of cultural analysis or better ideology critique – the ideology of Deterior is that it seems financial and Microsoft wants to privatise more and more – while its demystification is – ‘that’s how it works’ it just becomes in Spain –

truly Americanised and so runs better with more basically financial transactions and lines – deprived of this the normal daily politics and government plans continue – the ideology is this choosing of a option.

I. Breathtaking – a Figure like Hegel is alive among us

In fact Sirohi is a figure not like a common working citizen in World Bank, IMF and EU debates he keeps ethically informing and working with as basically institutions with the law and economics of financial profits being transacted – but he is not just this. Sirohi is in fact Hegel – the way he argues that he is an institution – like a Gutenberg

inspiring teacher and even a jazz music teacher who then is well versed in musical notations and staff processes which develop forty pages of notes, teaching and of course World Criticism – then of course one realizes he is Hegel – living life musically among us.

II. Practical Humanism – the Praxis of Sirohi

How then Deterior is about practical humanism – educating women, solving their healthcare, psychoanalysis and even libraries and scientific analysis – each day with a lecture which becomes the syntax of each day spent for Althusser “basically in utopian life, thank you God bless you all.”

Sirohi then is also in fact a Prophet in the modern context of the Quran and has a Biblical reference to Paul and is also in fact a Jewish guide – and so in fact helps Israel to win recently with the Cuban and Algerian, even Chinese politics of in fact economic heights – and is also a black rights activist – and then of course a leader in CPIM, CPI and CPIML.

Deterior is therefore a Communist organizing website and all the fun going on in it is just our old idea of what Alexandra Kollontoi calls our years and our dramas.

III. Deterior and Creative Hospitals

In fact then we live forever on Sirohi’s lead – he is also in fact with a creative hospital and has cured very easily many women with a few doctors and many nurses – Sirohi is in fact a scientific Marxist and doctor, even psychoanalyst – so another side of Deterior – from Hegel, to practical politics is then the third moment – psychoanalysis and daily life utopia – just see this as basically what is called his miserable life here and there being handled by a discourse of science while basically ecology is attacking him in the process to for us judge – the meaning of heroism – a joke on how to live in the case of a crisis in life – Sirohi is always a tragic singer of the Charles Mingus opera.
